C sources and target settings
0 Prepare the C program
Keep or redirect external calls
Record the chosen implementations and target
1 CBMC
Check C assertions within bounds
2 CompCert
Export the C execution model
and generate proof goals
Assertions and
counterexamples
Model and
proof goals
Bounded results
3 Rocq
State preconditions and prove
properties of model executions
4 Report
Bounded checks, theorems, open goals and costs
